

# EM EKG Fundamentals

68yM with PMHx of DM2, HTN brought to urgent care after syncopal episode at home. EKG completed and transferred to the ED. Patient mumbles/withdraws to noxious stimuli.

HR: 140	BP: 70/40
	RR: 22

## What is your interpretation of the EKG from the Urgent Care?

History/Clinical Picture	U Waves
Rate	T Waves
Rhythm	PR Interval
Axis	QRS Width
P Waves	ST Segment
Q/R/S Waves	QT Interval

## What is your interpretation of the ED EKG?

History/Clinical Picture	U Waves
Rate	T Waves
Rhythm	PR Interval
Axis	QRS Width
P Waves	ST Segment
Q/R/S Waves	QT Interval

## What is the algorithm for management of wide complex tachycardia?
